Abstract:

The ABCD Curated Data Release 4.0 includes high-quality baseline and early longitudinal data from ~11,800 research participants, including minimally processed brain image volumes and tabulated structural MRI, diffusion MRI, resting-state fMRI and task fMRI results, as well as all non-imaging assessment data from the genetics, mental health, physical health, neurocognition, substance use, mobile technology, and culture & environment domains. For neuroimaging assessments, this release contains all baseline data and half of the 2-year follow-up (second imaging timepoint). For non-imaging assessments, this release contains baseline and follow-up data for the 6-month, 1 year, 18-month visits on the full participant cohort, as well as interim data for the 2-year, 30-month, 3-year, and 42-month visits. For a detailed description of all the measures included in this release, download the Curated Data Release 4.0 Summary document.

Study Cohorts: (Note: fewer subjects were included in the package than exist in the study)

Cohort # - Cohort Type - Cohort Name - Age From - Age To - Add'l Criteria (Subject Count):

#1607 - Baseline - ABCD 4.0 Data Release - 105 - 1260 - None (7764659)

Cohort Hierarchy:

Cohort # - Name - Attribute

Study Measures:

Primary Measures

Secondary Measures
